

Mercury

The Kinyo Mercury is designed for use on heat-set web and sheetfed.

Features

- ThermaSphere® compressible layer
- A low heat generation carcass working in combination with our unique compressible layer provides excellent stability, uniform pressure, and superior color register.
- Tough, stable, and longer press life through improved shock absorption and rapid gauge recovery.
- New design printing rubber compound for longer life.
- The specially ground surface offers the optimum balance between web release, dot reproduction and ease of washing, all of which combine to offer the best lifetime on press.
