

Olympia LE

The Kinyo Olympia LE is designed for LED applications.

Features

- Newly developed 100% EPDM formulation specifically designed for LED ink delivers high resistance to gauge loss from chemical extraction, gives longer life and reduced image retention.
- Tough ThermaSphere® compressible layer remains stable offering longer press life through improved shock absorption and rapid gauge recovery.
- Specially profiled rubber surface delivers improved release, excellent ink transfer and reduces downstream contamination from wet trapping.
- Strict gauge control from blanket to blanket for excellent dot reproduction and even pressure.
