

TS2020-MDUV

The TS2020-MDUV is designed for UV printing
Metal Deco flat sheet.

Features

- "TS" - the next generation ThermaSphere® compressible layer - unique to Kinyo.
- High density carcass with thicker compressible layer resists edge marking with all substrates.
- This thicker compressible layer delivers even longer life on press, improved shock absorption and minimal gauge reduction.
- Closed cell compressible layer for quick smash recovery.
- EPDM surface compound for use with conventional UV lamps.
- Highly polished rubber surface gives excellent ink transfer.
- Designed for printing flat sheet metal deco.
- Carcass made with high strength - low stretch cotton textiles.
- Energy recovery and reduced solvent usage throughout the entire manufacturing process.
