

TS2020-UV

The Kinyo TS2020-UV is designed for sheetfed and packaging utilizing conventional curing lamps.

Features

- "TS" – the next generation ThermaSphere® compressible layer – unique to Kinyo.
- High density carcass with thicker compressible layer resists edge marking with all substrates.
- This thicker compressible layer delivers even longer life on press, improved shock absorption and minimal gauge reduction.
- Closed cell compressible layer for quick smash recovery.
- EPDM surface compound for use with conventional UV lamps.
- Semi-polished rubber surface gives excellent ink transfer and sheet release.
- Designed for general purpose sheet-fed applications and packaging.
- Carcass made with high strength-low stretch cotton textiles.
- Energy recovery and reduced solvent usage throughout the entire manufacturing process.
